### LOGIN: A logic programming language with built-in inheritance

H Alt-Kaci, R Nasr - The Journal of Logic Programming, 1986 - Elsevier

... For this reason, we shall use a pseudorecord **data structure** tagnode indexed on **tag** 3 This is superfluous in a real implementation where pointers or store addresses can be used. It is used here for presentation convenience and will disappear later. ...

### Trading **data** space for reduced time and code space in real-time garbage collection on stock hardware

RA Brooks - Proceedings of the 1984 ACM Symposium on LISP and ..., 1984 - portal.acm.org

... This will be enough to distinguish forwarding pointers when special **tag** values are not used for that purpose ... a forwarding pointer if one exists, but otherwise does nothing special except (2) in the case that the pointer is about to be written into an existing **data structure** (eg with ...

### Proof-carrying authentication

AW Appel, EW Felten - Proceedings of the 6th ACM Conference on ..., 1999 - portal.acm.org

... T is a **tag**, a **data structure** that describes a request or set of requests; and ... In practice, one

would want to model the SPKI **data structures** in great detail, for example, by expressing the **tag**-matching rules in logic. We simplify the model here for brevity. ...

### **[PDF] Answering XML queries on heterogeneous data sources**

I Manolescu, D Florescu, D Kossmann - Proc. of VLDB, 2001 - vldb.org

... a SQL query referring to well-identified local **data** sources, either relational or iOñ-compliant. Tuples resulting from the relational execution of this query are treated by a **tag**-ger module, that **structures** them into the desired XñL format of the result. This **structure** information is ...
